Rembrandt Portrait Photography Workshop

with award-winning photographer
Craig Rohse. **Bring your camera**
to join this fun and intriguing session.

In this fun and educative session you will
create a 17th century Dutch tronie* print
expressing your emotions. *tronie is a common type of works
common in Dutch Golden Age painting and Flemish Baroque painting,
that shows an exaggerated facial expression or a stock character in
costume.

You will capture a portrait portraying an outward
characterisation, but will be venturing into your
soul.

Rembrandt was a master of the golden age of
Dutch paintings and no other artist left behind
such a great array of self-portraits. He depicted
himself in approximately 50 paintings, 30 etchings,
and seven drawings.

Bring your favourite camera, no matter how big or
small, and wear something comfortable, to
portray who you are.

Once your portraits are created, they will be
printed to take with you.

Limited to 10 participants! **Book on 3408 9288**
